

# HARDY - durable and bold!

The markers are used to write on a variety of surfaces:

steel, rubber, wood, plastic, glass, stone and more.

# HARDY - durable and bold!

One of the hallmarks of our products is a reinforced marker tip that does not delaminate.

This makes it suitable for writing on a variety of aggressive textures.

The writing thickness is 2.5-3.0 mm.

The marker contains an ink pump valve - valve system.

# HARDY - durable and bold!

Quick-drying ink, intense colours,  
clearly visible.

An aluminium housing resistant  
to mechanical damage.

# HARDY - durable and bold!

## Method of use:

Shake the closed marker before each use. At the first time, pump by pressing until the ink runs down the entire tip. Use in ventilated rooms. Close after each use. Xylene-free. Keep away from children.
